Tier 1 Elements: Required to receive quarterly base payments

1. Care Coordination: Sign and comply with MSHP PCP/Specialist compact describing the expectations for bi-directional communication on mutually shared patients.

2. Program Engagement: Provide actively used email address for physician and office manager for program communications, and complete the CIN 101, CIN 201 and Clinical Documentation Quality Improvement (CDQI) modules on the Mount Sinai Clinical Integration Learning Center.

4. Practice Engagement: Meet with a provider engagement team member (including population health manager) as requested, up to ten times per year for PCPs. Also, attend at least 1 in-person meeting per year, either a Town Hall or a Regional (“Pod”) meeting; complete select mandatory online offerings, as requested.

5. Privacy Training: Complete the Mount Sinai Health System online 2019 Health Insurance Portability and Accountability Act (HIPAA) privacy training module on the Mount Sinai Clinical Integration Learning Center.

“I find MSHP’s CIN participation requirements to be reasonable and compatible with my efforts to improve patient care.”
– Martin Malachovsky, MD, Internal Medicine

Tier 2 Element: Required to receive annual incentive payments

1. Advancing Care Information: Install (or have under contract) a MIPS-Certified EMR system by 12/31/19. (If you meet MSHP’s quality reporting requirements by submitting a feed from your EMR, you may be exempt from obtaining a MIPS-Certified EMR.)

Tier 3 Element: Completion earns additional points toward your CI Index and annual incentive payments

1. Patient Access: Offer 24/7 access for patients to speak to and/or electronically communicate with a provider representative, gain instructions for off-hours access to urgent care or priority next-day access. Comply by adhering to MSHP policy or provide written policy for review by an MSHP Director or IPA Committee.

Delivering Value for the Primary Care Physician
Mount Sinai Health Partners’ Clinically Integrated Network

Have questions or are ready to join MSHP’s CIN? Contact your dedicated Provider Engagement Manager, email us at mshp@mountsinai.org or call us at 877-234-6667

Visit us at: https://mshp.mountsinai.org
Connect your independent practice with the clinical talent and resources of Mount Sinai Health System by joining Mount Sinai Health Partners’ (MSHP) Clinically Integrated Network (CIN). Community-based physicians and health-system-employed providers combine their clinical experience and knowledge to manage patient populations across the care continuum. Both community- and employed physicians share a vision of improving both the patient and provider experience and demonstrating results that are truly meaningful to our patients.

Be part of a physician-led team that values your voice. MSHP’s Board of Managers and affiliated committees help define the program and benchmarks. Take advantage of our provider engagement and population health managers who work with your practice to reduce administrative and clinical challenges. Identify opportunities for clinical and financial improvement with analytics platforms that offer as-admittant reporting on your patients to help you provide appropriate and efficient patient care.

What is Clinical Integration?
Clinical Integration is an active and ongoing program to create a network of high-quality, high-performing physicians and practices. The goal of clinical integration is to improve patient care and satisfaction by creating a high degree of interdependence and cooperation among health care providers to control costs and to demonstrate quality improvement.

What is the MSHP CIN?
The MSHP CIN is an ongoing collaboration of over 3,500 physicians and other providers covering allfive boroughs of NYC and Long Island that aligns incentives with outcomes, quality, and efficiency. Our CIN is a physician-led, physician-driven care delivery system that combines the latest in evidence-based practices with innovative analytics technologies.

Physicians actively participate in the CIN, meaning they serve on committees, participate in training, and help define and work toward achieving clinical and quality benchmarks. Clinical metrics and processes support physicians in pursuit of measurable quality benchmarks. Community physicians who join the CIN value their ability to remain independent practitioners.

What is Clinical Integration?
Clinical Integration is an active and ongoing program to create a network of high-quality, high-performing physicians and practices.

- Clinically integrates your practice with the high-quality, cost-effective specialty services of the Mount Sinai Health System and creates stronger collaboration with a variety of specialties.
- Offers you access to user-friendly resources, tools, IT platforms, and quality and cost-effective care delivery performance reports to help you better manage your patients/practice.
- Ensures that the CIN holds high-performance standards through your and the network’s achievement of annual CIN requirements that focus on education, engagement, and quality performance. Quality metrics compare providers to industry and peer-to-peer benchmarks.
- Provides you the ability to become available as a preferred network provider and offers higher level of collaboration with other physicians.
- Allows you to spend more time on patient care and less time on credentialing and re-credentialing with multiple payers by taking advantage of MSHP’s credentialing delegation status with all major payers.

What if I already work with Mount Sinai Health Partners (MSHP)?
MSHP has helped me grow as a physician, and an entrepreneur by enabling me to provide up-to-date, evidence-based medical care to my patients. I have learned that professional excellence is not about quantity but quality.

“MSHP has helped me grow as a physician, and an entrepreneur by enabling me to provide up-to-date, evidence-based medical care to my patients. I have learned that professional excellence is not about quantity but quality.”

Sonia Gidwani, MD, Pediatrician

At MSHP, Clinical Integration is About Transformation

In order to maximize quality, efficient care while minimizing costs, MSHP negotiates, on behalf of CIN members, contracts that recognize the value of this important work — including, for example, shared savings arrangements, pay-for-performance bonus programs, care coordination fees for PCPs, and negotiated fee schedules.

Clinical Benefits of the MSHP CIN

- Clinical Integration offers you access to user-friendly resources, tools, IT platforms, and quality and cost-effective care delivery performance reports to help you better manage your patients/practice.
- Clinical Integration ensures that the CIN holds high-performance standards through your and the network’s achievement of annual CIN requirements that focus on education, engagement, and quality performance. Quality metrics compare providers to industry and peer-to-peer benchmarks.
- Clinical Integration allows you to spend more time on patient care and less time on credentialing and re-credentialing with multiple payers by taking advantage of MSHP’s credentialing delegation status with all major payers.
- Clinical Integration helps you achieve clinically integrated performance related to incentives.
- Clinical Integration offers you access to innovative analytics technologies.

Collective Contracting Benefits

- Clinical Integration allows you to spend more time on patient care and less time on credentialing and re-credentialing with multiple payers by taking advantage of MSHP’s credentialing delegation status with all major payers.
- Clinical Integration offers you access to innovative analytics technologies.

In order to maximize quality, efficient care while minimizing costs, MSHP negotiates, on behalf of CIN members, contracts that recognize the value of this important work — including, for example, shared savings arrangements, pay-for-performance bonus programs, care coordination fees for PCPs, and negotiated fee schedules.

The financial benefits of joining the CIN include:

- Ease of transition into value-based contract participation
- Contracting with payors jointly with other CIN physicians through a single signature authority
- Participating in negotiated fee schedules with payors
- Provision of a mechanism for primary care physicians to share in surplus funds after achieving quality and efficiency performance benchmarks
- Expanded access to payer networks that might otherwise be closed to enrollment
